

ESRI Philadelphia Region Transportation Special Interest Group Meeting

Tuesday, June 15th, 2010
9:00am – 12:00pm
Registration begins at 8:30am

ESRI Philadelphia Regional Office
1400 Morris Drive, Suite 102
Chesterbrook Corporate Center - Chesterbrook, PA

Directions: <http://www.esri.com/about-esri/philadelphia.html>

Connect with your peers and ESRI industry specialists and take part in discussions that explore how the latest GIS software aids transportation professionals by integrating new and exciting GIS tools into your workflows. You'll see demonstrations and best practices for ArcGIS10, all in a transportation context. Plus, we'll have an open forum for you to learn and share about data interoperability assertions, challenges, and solutions.

Highlights

- Find out about two new ArcLogistics deployment patterns illustrating how you can create optimized routes and schedules in less time using not only ArcGIS Desktop but also new Software as a Service (SaaS) and ArcGIS Server.
- Hear what's new with ArcGIS Network Analyst; the next release of this popular desktop and server extension offers many new modeling and analysis capabilities including a location-allocation solver, datasets to help model historical traffic, and barrier types.
