

Janel Bisacquino

jbisacquino@mercercounty.org

Janel is a Geospatial Intelligence Analyst and Systems Administrator with over 15 years experience building GIS for asset management and training government agencies, private industry and NGOs to do the same. She has a background in both social and physical sciences, as well as multi-source data collection and management. Her younger days were spent as an archaeologist employing GIS to map the sands of time and rediscover past civilizations both in the U.S. and abroad.

Company: Mercer County DOT&I Highway Division

Education: Graduate Studies in Geography, Surveying, and Geomatics, Web Development, GIS Programming and Customization, and Business Analysis

Interests: Leveraging free geo tools, Geodata creation and management, Enhancing everyday business workflows with sustainable geospatial tools for more effective and efficient outcomes.

GIS Achievement: Every day brings a new opportunity for greater achievement

What I like about MAGTUG: The community

Factoid: Never used any Esri GIS products until 2002
