

Paul Menichelli

pmenichelli@dewberry.com

Although GIS is not my primary function, I use it almost daily for maintaining an inventory of Intelligent Transportation Systems (ITS) devices and for ITS device installation designs. Knowing the location of existing and proposed facilities for a number of public agencies viewable in a GIS provides valuable insights into potential sharing opportunities among public transportation agencies which translates into more efficient use of government funds.

Company: Dewberry Engineers, Inc

Interests: Linear Referencing, Line-of-Sight Analysis, Asset Management

What I like about MAGTUG: MAGTUG promotes the use of GIS specifically for Transportation
