

Simon Lewis

simon.lewis2@aecom.com

He worked thru setting up his first company, GIS/Trans, to help popularize the use of GIS in transportation. He was very active as a field evangelist for FHWA in teaching GIS best practices courses and in automated highway data collection, in 35 states. He worked on projects from smallest town to large FAA and FHWA national projects, such as for the National Highway system. Keynote speaker at many national transportation conferences. The last decade he has subsequently focused on transportation asset management applications, and performance management including work with major and local asset management software vendors. Currently, he is National Asset Management Lead with AECOM, focusing on national agency asset management solutions.

Company: AECOM

Education: Master's degrees in Transportation and PhD from MIT, in LRS and geospatial database design
